Important **NEW** Product Launch

The Adaptor Coil fitment has dramatically changed recently due to the Vehicle Manufacturers each having a unique, individual wiring sequence to suit their vehicles operating system. We at EBS have been aware of this change and are able to offer these coils to suit the individual applications, helping to keep your customer on the road!!

Part No.	Description
01-249	Iveco Application
01-247	MAN Application
01-248	Mercedes Application
01-246	Scania R Series Only
01-250	Standard ISO 12098 Application*

**DAF, Renault, Scania (except R Series) & Volvo remain unchanged from the standard ISO (01-250) for now!!*

Part No.	Description
01-956	EBS Screw Terminal 7Pin 24V ISO 7638 Socket

The EBS 7 Pin ISO Socket comes complete with Screw Terminals helping to reduce replacement downtime. Incorporates full wiring markings on each individual terminal.

GGVSE/ADR certified.

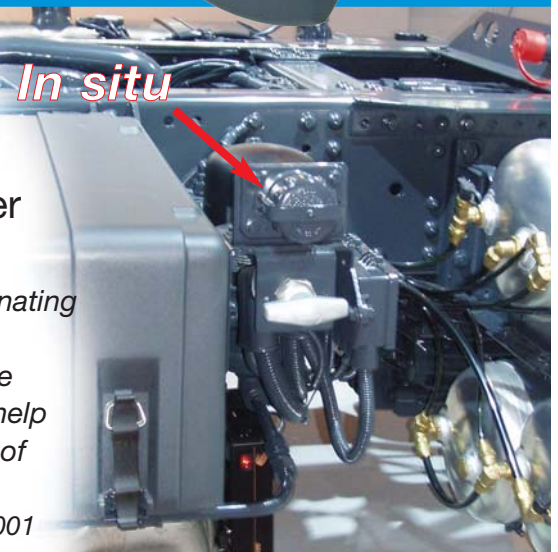

Truck **Starter** Socket *In situ*

Part No.	Description
01-957	Truck Starter Socket

A great new product eliminating the need for Jump-Leads. This will fit onto the vehicle and, via a 2 pin plug, will help make the "Jump starting" of vehicles easier and safer!

Manufactured to VG96917 A-001

Please note that the above items are manufactured to O.E. Specification and meet all ISO, GGVSE & ADR regulations.
